GreenBest

Flexible Manufacturing

It's all in the mix

Trust in Flexible Manufacturing

GreenBest Ltd

The leading manufacturer of “bespoke” granular and liquid fertilisers for the professional market

Our 15 years of experience producing high quality products makes us one of the market leaders in this industry both in the UK, Europe and further afield. We can blend all types of granular and liquid fertilisers specialising in golf courses, sports pitches, recreation turf, landscaping, lawn-care, gardens and other amenity areas. Our main speciality is the ability to manufacture, store and despatch “own brand” products on your behalf.

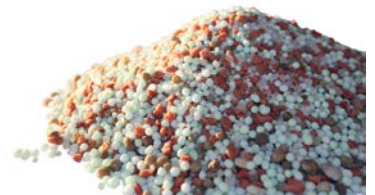

Flexibility - With our method of manufacturing we currently hold over 5000 different ratios of fertilisers on our database so we feel very confident we can offer existing and new customers exactly what they need. We can offer our products in a range of bag designs, sizes and quantities to suit you.

Ingredients - At GreenBest we take great care in sourcing high quality raw materials ensuring the right particle sizes, compatibility and user friendliness. Our portfolio includes a huge range of NPKs, slow and controlled release, organics, bio stimulants, wetting agents, foliar feeds, and many other specialist products and ingredients.

Appearance – All our products go through a stringent quality control process to assess uniformity in particle size, which allows accurate spreading. We undertake full filtering of products before bagging or canning.

Performance – We purchase only the highest quality ingredients both fast and slow release. We always test that the individual ingredients will be compatible. With regards to granular products we check that the correct particle size is used to fulfil the job.

Quality – In our manufacturing process we have full capabilities to grind and sieve any ingredient. Our sieving process allows us to minimise dust and maximise uniformity in particle size allowing accurate spreading.

Accreditations and Traceability

Our Market

Greenbest manufacture different types of products for different types of clientele.

To service all these individual markets we adhere to the following standards.

Appearance

All our products go through a stringent quality control process to assess uniformity in particle size allowing for accurate application. We undertake full filtering of products before bagging or canning.

Performance

We purchase only the highest quality raw materials, always testing individual ingredients for compatibility.

Traceability

We are fully accredited with internationally recognised standards.

Quality

In our manufacturing process we are fully able to grind and sieve any dry, grind-able ingredient. Our sieving and filtration processing equipment ensures minimal contamination and the highest quality sample to present to any market.

Flexible Packaging

The possibilities with flexible packaging are endless. Greenbest can offer all different types of packaging for both liquid and granular formulations.

Liquid

Products can be supplied in anything from a 500ml container designed for the retail market to a 1000Ltr IBC container designed for professional markets such as the agriculture, amenity and horticultural.

Granular

We package small bags for retail as well as 20Kg, 25Kg, 500Kg and 1000kg bags for professional markets.

Trust in us, We are Accredited

We provide full traceability on all products, whether dry or liquid, for 2 years from manufacture.

BS EN ISO 9001: 2008

Certificate No: GB 6516

By far the world's most established framework, setting the standard not only for quality management systems but management systems in general. Stating customer satisfaction, staff motivation and continual improvement.

BS EN ISO 14001 : 2004

Certificate No: GB 11748

This is an internationally accepted standard that sets out how we can go about putting in place an effective Environmental Management System (EMS). This standard addresses the delicate balance between maintaining profitability and reducing environmental impact.

FIAS

Scheme ID: 47500

With this standard Greenbest can assure fertiliser security and full traceability in the industry supply chain.
